

Is it OK to use scaffolding to install photovoltaic panels

Should you use scaffolding to install solar panels?

When solar panels are being installed, the solar firm will need to put up scaffolding. You or a friend can take advantage of this and use the scaffolding to patch the worst roof leaks. The cheaper electricity from the solar panels may put you in a better financial position to take out a loan for a more thorough roof repair job in a few months' time.

Do I need a Scaff tag before PV installation?

Before PV installation: Please email photos of the scaffold including one of the scaff tag to operations@naked solar.co.uk at least 3 days prior to installation date so that any issues can be ironed out prior to the arrival of our installation team to ensure your install can go ahead on schedule.

Do commercial scaffolding installations require a loading bay?

Commercial installations: All scaffolding installations at commercial properties must offer 2 points of access/egress. They also may require a loading bay for lifting equipment onto the roof space safely. All commercial scaffold installations will be reviewed at design stage by our operations team.

Do I need a ladder to install a scaffold?

If access has to be on the platform edge, then a fall arrest gate must be fitted. A ladder fixed to the scaffold must be provided on all scaffold installs. Panel Access: The panels are a max of 2.2m by 1.1m and made of glass, we need good access to get these panels to the top lift safely.

How high should a solar panel platform be?

Platform Height: Platform must be <400mm from the bottom edge of the roof fabric. Edge protection requirements: Either, platform must extend at least 1.5m beyond the outer edge of the PV array, or, double handrail edge protection outside of the PV array edge running from eaves to ridge.

Do scaffolds need to be tagged?

Tag: All Scaffold installations must be tagged. Toe Boards: Outer toe boards on all scaffold. Platform must extend in to the building side. If it's not practicable, then an inner toe board is required to prevent falling objects. Platform Height: Platform must be <400mm from the bottom edge of the roof fabric.
