

## It s called capacitor energy storage seam welding

The Stored Energy welding power supply - commonly called a Capacitive Discharge Welder or CD Welder - extracts energy from the power line over a period of time and stores it in welding ...

It's called spot welding because this welding method creates a tiny dot weld, that looks like a spot. ... the spot welder needs to have a capacitor system. This allows it to &quot;charge&quot; and store ...

You know how traditional welding methods often struggle with thin materials or heat-sensitive components? Well, capacitor energy storage welding (CESW) solves these problems through ...
