Who is ITM Power plc?

ITM Power plc is an energy storage and clean fuel company founded in the UK in 2001. It designs, manufactures, and integrates electrolyzers based on proton exchange membrane (PEM) technology to produce green hydrogen using renewable electricity and tap water. Hydrogen produced via electrolysis is used for mobility, Power-to-X, and industry.

Where is ITM Power located?

ITM Power is based in Sheffield, where it operates the world's largest electrolyser factory with a capacity of 1GW (1,000MW) per annum. They have announced intentions to build a second UK Gigafactory in Sheffield with a capacity of 1.5GW, expected to be fully operational by the end of 2023.

What is ITM Power Gigafactory?

ITM Power Gigafactory. Image by ITM Power () UK-based hydrogen energy solutions developer ITM Power Plc (LON:ITM) is fully funded to build a second polymer electrolyte membrane (PEM) electrolyser factory with an annual production capacity of more than a gigawatt, an official told Renewables Now.

Is ITM Power ready to build a new facility?

It is equipped with machines supporting the semi-automation of stack production. According to James Collins, head of investor relations at ITM Power, the company is fully funded to build another facility, even bigger than the current one, with a higher degree of automation and a greater test capacity.

Will ITM Power build a second polymer electrolyte membrane factory?

UK-based hydrogen energy solutions developer ITM Power Plc (LON:ITM) is fully funded to build a second polymer electrolyte membrane (PEM) electrolyser factory with an annual production capacity of more than a gigawatt, an official told Renewables Now. **FACTORY AND GROWTH**

Where is ITM Power deploying a 10 MW electrolysis system?

In January 2018, ITM Power signed a deal to deploy a 10-MW electrolyser at Shell's Rhineland refinery in Germany. The output of the electrolysis system will be used for the processing and upgrading of products at the refinery's Wesseling site.

The integration of renewables into an island's power grid soon creates substantial balancing and curtailment problems. These can be overcome by deploying controllable rapid response electrolyzers to produce green hydrogen for the ...

ITM Power Plc designs and manufactures proton exchange membrane (PEM) electrolyzers in the United Kingdom, Germany, Australia, rest of Europe, and the United States. The company's product portfolio comprises TRIDENT, an PEM electrolyzers stack technology; NEPTUNE, a 2MW plug and play electrolyser
