| U.S. DEPARTMENT OF ENERGY 3 U.S. DOE Solar Energy Technologies Office Our mission is to accelerate the advancement and deployment of solar technology in support of an equitable transition to a decarbonized economy no later than 2050, starting with a decarbonized power sector by 2035. Be affordable and accessible for all Americans

The Solar Training Network addresses a critical need for high-quality, local, accessible training in solar installation and related skills. It was established under the Solar Training and Education for Professionals (STEP) funding program in 2016 and is administered by The Solar Foundation. The Network allows for greater connection between solar employers, trainers and training ...

The vertical bifacial solar array is the first such installation in New Jersey. "DOE recognizes the enormous opportunity for agrivoltaics to combine agriculture with clean energy production, while increasing revenue for farmers and landowners," said Dr. Becca Jones-Albertus, director of the U.S. Department of Energy (DOE) Solar Energy ...

The vertical bifacial solar array is the first such installation in New Jersey. "DOE recognizes the enormous opportunity for agrivoltaics to combine agriculture with clean energy production ...

The U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) Fiscal Year 2022 Advancing Equity Through Workforce Partnerships is a \$13.5 million funding program for the development of collaborative workforce programs. The program facilitates the rapid deployment of solar energy technologies while supporting an inclusive workforce ...

Energy Incentives . State Incentives: Board of Public Utilities Clean Energy Program; New Jersey's Board of Public Utilities and its Clean Energy Program (NJCEP) promote increased energy efficiency and the use of clean, renewable sources of energy. Energy efficiency is the easiest, most cost-effective way to reduce energy use and hence, reduce criteria ...

New Jersey has a statewide goal of 100% carbon free electricity by 2035. New Jersey already has 1.1 GW of solar, wind, and storage capacity, and there is almost 2.2 GW of additional planned clean energy capacity in the works, which will almost triple the amount of clean energy available on the state's grid and power more than 240,000 additional homes.

Expanding the community solar market and solar workforce to reach its multi-gigawatt potential while ensuring income-verified households have meaningful access to the benefits of clean energy. History . On July 27, 2022, DOE and HHS announced the development of the Connector. Illinois, New Mexico, New York, New Jersey, Colorado, and the ...

Through the permanent Community Solar Energy Program, New Jersey expects to see higher rates of solar project completion, increased low-to-moderate income household participation, decreased energy burdens for residents, increased municipal or public entity involvement, and continued siting of solar projects primarily on
