

Kyrgyzstan solar panel in house cost

How much do solar panels cost?

The manufacturing process for photovoltaic (PV) cells has been optimized so much in the past 10 years that prices have dropped almost 70%. High-efficiency panels for homeowners cost \$7.53/W in 2010 and now hover around an average of \$2.65/W. This is especially impressive considering how much more energy-efficient solar cells have become.

How long do solar panels last?

With most panels lasting 25 - 35 years, this leaves you a decade at least to reap the rewards of solar energy. To calculate your solar payback period, divide your solar panel system's cost by your yearly electricity bill savings. For example, if you spent \$15,000 and now save \$2,000 a year, your solar system will take 7.5 years to pay for itself.

What financing options do solar installers have?

You'll see four major financing options when dealing with a solar installer: cash purchases, solar loans, solar leases, and Power Purchase Agreements (PPAs). With a cash purchase, you'll pay for everything right off the bat.
