## Liberia solar panel on the roof

So why not have backyard solar panels instead of roof-mounted ones? Any panels that go on your roof are limited by the roof's design. For instance, your roof may run east to west instead of north to south. This means you don't have a south-facing surface to use when you install. As a result, you can't take advantage of the maximum amount ...

Why aren't solar-powered cars practical? A typical home needs a solar array covering 500 square feet to produce as much power as the people inside need in a year. Ideally, those panels are placed on a south-facing roof with an optimum tilt of about 30 degrees, give or take a few. A few years ago, we did the math on how many solar panels you need to charge an electric car.
