

The central battery system in the TKT7 series offers an efficient, high-tech emergency lighting solution. You can easily modify the system according to your needs, making the new TKT7 series a truly flexible choice. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings ...

The 65C central battery unit is optimal for small properties, but may be also used in bigger projects, when dividing the emergency lighting into several independent areas. The system has 8, 16 or 24 output circuits depending on the type. Maintained and non-maintained luminaires can be installed in the same circuit.

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. The central battery system in the TKT78C series is particularly suitable for medium-sized buildings.

TKT65B series central battery system offers an effective solution to supply medium to high number of emergency and exit lights. It is suitable for medium sized buildings. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings, and ships. +358 3 883 020

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 78C central battery unit has 4-24 output circuits. Max. battery capacity 65 Ah.

Central Battery Unit. In a centrally supplied system, the emergency and exit lights share a common power supply from a central battery unit. In its basic form, the central battery system monitors the mains voltage, maintains the charging of the batteries and supplies power to maintained luminaires in the normal mode.

The 31 and 41 central battery units are an easy and economical solution for supplying a relatively small number of luminaires in a limited area. These systems are especially suitable for properties and premises where the system is to be divided into several independent areas. The 31 system has 4 output circuits.

CENTRAL BATTERY SYSTEM Central Battery Systems in the TKT67 series offer effective solutions for supplying a large quantity of luminaires. They are especially suited for large premises. The central unit input voltage is 220-240 VAC. The output voltage is 220-240 VAC in normal mode and 216 VDC in battery mode. The battery
