

Mali electric solar

Why is Mali building a new solar power plant?

As Mali grapples with an ongoing electricity crisis that hampers economic growth, transitional President Assimi Goita laid the foundation stone for a new 200 MW photovoltaic solar power plant. The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector.

Why is Mali launching a 200 MWp solar power plant?

Loading... Mali's President Assimi Goita has launched a 200 MWp solar power plant project with NovaWind, a Rosatom subsidiary, to address the nation's electricity crisis and promote sustainable energy. The EUR200 million investment aims to supply 10% of Mali's electricity within 12 months.

Which company is constructing a new energy plant in Mali?

The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector. In recent weeks, Mali's transitional government has intensified efforts to implement this solution nationwide.

Where does Mali get its electricity from?

The other source is the Manantali dam, in Mali, which stores about 11 billion cubic meters of water. The nearby Manantali 200 MW hydropower station is the main one in the region and, supplies 55 percent of its electricity to Mali, while the rest is equally shared between Mauritania and Senegal.

Where is the largest solar power plant in Sub-Saharan Africa?

On May 24, 2024, President Goita visited Sanankorobain the Kati Cercle to initiate the construction of the largest solar power plant in sub-Saharan Africa, covering 314 hectares. About thirty kilometers from the capital, Bamako, this project is part of a government partnership with NovaWind.

How much will NovaWind invest in Mali?

NovaWind will invest EUR200 million in the Mali project, expected to be operational in 12 months. The plant aims to supply 10% of Mali's electricity. Before the construction commenced, President Goita met with NovaWind's Managing Director, Grigory Nazarov, to discuss the project's progress.

alternative energy ...

Summary Location Overview Ownership Timeline Other considerations See also External links Sanankoroba Solar Power Station is a 200 MW (270,000 hp) solar power plant under construction in Mali. The power plant is in development under a public private partnership (PPP) arrangement between the government of Mali and NovaWind, a subsidiary of the Russian conglomerate Rosatom. The output of this solar farm is expected to be sold to the national electric utility, Energie du Mali (EDM-SA), for integration into the Malian national grid.

Mali has a strong foundation for renewable energy, particularly solar power, due to its high solar irradiation levels of 5-7 kWh/m²/day across the territory, making it an attractive location for solar thermal plant projects.
