What is optergy BMS?

Accessible securely via any network-connected device, our system ensures you're always in control, wherever you are. Optergy's BMS solution provides a suite of advanced tools to streamline information access: Create bespoke user profiles with varying levels of access--from full system control to view-only modes.

What is optergy enterprise software?

Optergy Enterprise software provides a web-based, real time scalable solution to improve control and reporting within buildings. It is an exclusive Building Management System and Energy Management System that provides a full suite of tools to measure, manage, report and analyze building data to make it a Smart Building.

Why should you choose optergy BMS through leading edge automation?

Tailor experiences for different team members or restrict access to energy management only, focusing on individual energy consumption metrics. By adopting the Optergy BMS through Leading Edge Automation, you're choosing a smart, secure, and efficient way to manage your building's ecosystem. Keep up to date with the latest automation news.

Does optergy integrate with BACnet & Modbus protocols?

Optergy's software integrates with BACnet and Modbus protocols, the industry's standard for HVAC equipment. Users can stay connected and have full control over the building assets. Optergy's built-in tools and applications enable the following smart solutions: With effective monitoring also comes efficient controls.

Who is optergy?

Optergy delivers industry leading integrated Energy Management, Building Automation and Smart Integrated Solutions to the Commercial, Industrial, Healthcare and Institutional building market sectors with great offering of flexibility and ease of use which is unmatched in the industry.

Where is optergy located?

Optergy is part of a global group of companies with operations in Malaysia, Singapore, Australia, The United States of America and The United Kingdom. Our origins are Australia where our group holding company, Oberix Group, is also one of the largest energy management and building automation companies
