[News flash] Congratulations on Sinosoar's successful HSE certification specialized in solar mini-grid engineering works! CASES-Solar Hybrid System Project for Warehouse in Uganda - SINOSOAR <style>.wpb_animate_when_almost_visible { opacity: 1; }</style>

More than 300 small-scale farmers in Uganda are set to receive solar irrigation systems under the Uganda Intergovernmental Fiscal Transfer programme. This is to assist them to adapt to climate change challenges, said Dr Samuel Kaheesi, the Principal Agriculture Officer for the Kikuube District, where the farmers live in Uganda.

Solar irrigation pumps are a game-changer for farmers Uganda. They convert sunlight into electricity, powering pumps that draw water from wells, rivers or lakes to irrigate crops. This technology eliminates the need for costly and polluting diesel or electric pumps reducing both operational costs and carbon footprint.
