Should you install solar panels in Spain?

This is especially true given that the cost-of-living crisis means that energy bills are higher than ever in Spain, so having your own cost-effective energy source attached to your home might be an added incentive to take the plunge and research solar panels in Spain. How much will they cost? What are the pros and cons of installing them?

How much does it cost to install solar panels in Spain?

The cost of installing solar panels varies based on your energy needs and location in Spain. On average, it costs between EUR6,500 and EUR10,000 (excluding batteries). SolarMente offers an all-in-one solution combining solar panels, energy storage, and smart power management, you can enjoy self-consumption and maximise your energy savings.

Are solar panels eco-friendly in Spain?

It means the carbon footprint of manufacturing 16 solar panels is equivalent to the carbon footprint of 3 kWh in Spain - most detached homes here will consume 3 kWh by midday in a single day. This makes a solar panel installation in Spain very eco-friendly. While solar energy is renewable most solar panels come with a lifespan up to 25 years.

Is solar energy a good investment in Spain?

As you can see, solar energy has indisputable potential in Spain. Installing solar panels in Spain means significant financial savings from day one, making you the owner of your energy. Similarly, the use of renewable sources such as solar energy leads us to an energy model based on sustainability.

Can solar panels reduce energy costs in Spanish homes?

With energy prices continuing to rise, many Spanish property owners are looking for new ways to reduce their expenses. One option that can help to lower the cost of your energy bills is to install solar panels on your Spanish home.

Can I get a grant if I install solar panels in Spain?

If you install solar panels in Spain and apply for EU funding before 31st December 2023 you can receive EUR3,000 in grants. But note that the grant of 600 EUR/kWp is also only available for solar panel installations in Spain with a kWp under 10.
