

National development energy storage credit

Who can claim energy storage credits?

Taxpayers with a qualified facility and energy storage technology placed in service after Dec. 31, 2024 may claim the credit. Elective payment and transfer of credits may be available to certain applicable entities to include tax-exempt organizations and government entities.

What regulatory guidance has the government released on energy storage?

Of particular importance to the energy storage industry, the government has released final regulatory guidance for the ITC (both Section 48 and 48E of the Code), prevailing wage and apprenticeship (PWA) requirements, and transferability and direct payment, as well as other guidance on the energy community and domestic content tax credit "adders."

Does battery energy storage qualify for a domestic content adder?

Given the current state of battery cell production in the United States, battery energy storage has largely been locked out of a financeable position on qualifying for the domestic content adder given the stated materiality of battery cells to a domestic content analysis.

How much credit does a facility get?

Credit is increased by up to 5 times or up to 30% for facilities meeting prevailing wage and registered apprenticeship requirements. 10-percentage points for facilities meeting certain domestic content requirements for steel, iron and manufactured products. 10-percentage points if located in an energy community.
