New Caledonia (/ ˈ k ɛ ɪ ˈ d oʊ n i ː / (i) KAL-ih-DOH-nee-?; French: Nouvelle-Calédonie [nuvel kaled?ni] (i)) [nb 2] is a group of islands in the southwest Pacific Ocean, 220 km (140 mi) southwest of Vanuatu and 1,210 km (750 mi) east of Australia. [5] Located 16,100 km (10,000 mi) from Metropolitan France, it forms a sui generis collectivity of the French Republic, a legal ...

Beneath the emerald canopy of New Caledonia lies a quiet force that will power the world's green energy revolution. With a modest population of 300,000, the French territory is the fourth-largest nickel producer ...

New Caledonia was part of the continent Zealandia, which broke off from the supercontinent Gondwana between 79 million and 83 million years ago. [11] The earliest traces of human presence in New Caledonia date back to the period when the Lapita culture was influential in large parts of the Pacific, c. 1600 -500 BC or 1300-200 BC. [12] The Lapita were highly skilled ...

New Caledonia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

TotalEnergies SE TTE announced that it will develop clean energy and energy storage projects in New Caledonia. Within the 2022-2025 time period, TotalEnergies will develop ground-based ...

France is rushing security reinforcements to its overseas territory of New Caledonia, a crucial foothold for Paris in the Indo-Pacific, after days of violent riots that have led to the deaths of ...

In 2022, New Caledonia's electricity consumption was heavily reliant on fossil fuels, making up more than 80% of the total energy mix. Coal was the largest contributor within this category, accounting for about half of the total electricity use. On the other hand, low-carbon or clean energy sources played a smaller role, constituting just under 20% of the electricity consumption.

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.. Between 2022 and 2025, the ...

New Caledonia's energy profile and interest in renewables. New Caledonia's 2018 energy review showed that its electricity production from renewable sources, solar, wind, hydro and to a lesser extent biomass, was 11.7%. The national electricity grid operator Enercal uses energy drawn from these renewable sources first, then draws from carbon ...
