New Caledonia is a French territory made up of a group of islands and archipelagoes of Oceania, located in the Coral Sea and the South Pacific Ocean. It has a wide lagoon often considered "the most beautiful lagoon in the world". The territory is also distinguished by biodiversity of astonishing richness and originality: the rate of endemic species is the highest in the world.

helping professionals like panda pandita discover inside connections to recommended job candidates, industry experts, and business partners.

"At the time, we did not know what the dry forest was," recalls Claude Metzdorf, a livestock farmer from New Caledonia. "It was like any forest on the seashore, without any special value." In 1996, Claude and his father received a visit from Jean-Marie Veillon, a botanist from the French government Research Institute for Development (IRD).

In New Caledonia, early public sector engagement in the programme helped to secure the necessary long term commitment. Consider scale and the mosaic of land use across a landscape: Linkages in the landscape promote resilience and sustainability. Because of the highly fragmented nature of New Caledonia's dry forest, it was particularly ...

Collective solar hot water production installations are frequently used in tropical climate zones and more and more in temperate climate zones for different applications: apartment buildings, hotels, industrial or agricultural applications. This type of equipment must first be the subject of an in-depth study by a design office for the sizing ...
