

Artificial intelligence can prove to be a real asset to microgrid control and interoperability. These are some of the memorable takeaways that California-based microgrid developer New Sun Road gained from its ...

The Microgrid Knowledge conference series, founded in 2016, attracted more than 4,000 attendees to its virtual and in-person events in 2021. Microgrid 2022 was its largest and most exciting in-person microgrid gathering yet, with more than 60 microgrid innovators and visionaries bringing lively discussions and presentations to the stage. ...

Microgrids are a huge part of the consideration for future energy delivery to data centers and other industrial customers. And one conference is solely devoted to microgrids. The Microgrid Knowledge 2024 event is happening April 22-24 in Baltimore at the Marriott Waterfront Hotel. The latest conference marks many first-time changes for MGK.

Reverse cycle air-source heat-pumps are an increasingly significant load in New Zealand and in many other countries. This has raised concern over the impact wide-spread use of heat-pumps may have ...

Boulder, Colorado - August 11, 2020 - HOMER Energy by UL, the global leader in the development of standard-setting energy modeling software, announced today that registration is now open for the 8th annual HOMER International Microgrid Conference, taking place online October 12-16, 2020. This year's conference is sending a global call to "Join the Microgrid ...

governments. PEP aims to connect 70% of the country's population to electricity by 2030. For its part, USAID has a goal of connecting ...

This paper evaluates the feasibility of using a hybrid system consisting of wind and tidal turbines connected to a microgrid for power supply to coastal communities that are isolated from a main supply grid. The case study is Stewart Island, where the cost of electricity, provided by a central diesel power station, is higher than the grid network in New Zealand. ...

The establishment of the concept of sustainable, decentralised, multi-carrier energy systems, together with the declining costs of renewable energy technologies, has proposed changes in off-grid electrification interventions towards the development of integrated energy systems. Notwithstanding the potential benefits, the optimal capacity planning of such systems with ...
