Who makes Sharp Solar panels?

Peter Thiele, President of Sharp Energy Solutions Europe Sharp's portfolio of high-performance solar modules is built for residential, commercial and free-field installations. We constantly adapt our range of PV panels to the latest technologies and check every new technology thoroughly before use to ensure longevity.

How many solar panels does sharp sell?

To date, Sharp has delivered more than 50 million cutting edge photovoltaic (PV) panels worldwide, meeting the needs of thousands of international solar energy customers. From our European office we sell our solar power systems to installers, distributors and project companies in Europe, the Middle East and Africa.

Who is Sharp Solar Energy?

Providing solar energy solutions has been Sharp's core competence for 65 years. To date, Sharp has delivered more than 50 million cutting edge photovoltaic (PV) panels worldwide, meeting the needs of thousands of international solar energy customers.

Where are sharp solar panels used?

Sharp solar panels are operating in many areas; from family homes and installations in extreme environments such as lighthouses and satellites, to recently completed megawatt-scale solar power plants. 'Sharp's innovation and developments into module technology over half a century have allowed us to always improve and adapt to market circumstances.

Why should you choose Sharp Solar panels?

Sharp's portfolio of high-performance solar modules is built for residential, commercial and free-field installations. We constantly adapt our range of PV panels to the latest technologies and check every new technology thoroughly before use to ensure longevity. We strictly source quality components and test our panels above IEC standards.

Pioneros solares de SHARP: el sistema fotovoltaico de Jochen Leiffer cumple 28 años. En el marco de nuestra serie «Pioneros solares de SHARP», presentamos instalaciones solares que ...

Una instalación solar fotovoltaica consta de varios componentes. Los paneles solares son el corazón de cualquier instalación fotovoltaica, pues convierten la luz del sol en corriente eléctrica. La corriente que producen los paneles solares es corriente continua, lo que significa que la corriente fluye de forma homogénea en una dirección.
