Located at latitude 42.4411 and longitude 19.2632, Podgorica, Montenegro is a favorable location for solar photovoltaic (PV) installations due to its substantial sunlight exposure throughout the year. During the Summer season, each kilowatt of installed solar capacity can yield an average of 7.13 kilowatt-hours per day thanks to extended daylight hours and intense sunlight.

Kotor, Montenegro (latitude: 42.424662, longitude: 18.771234) is situated within the Northern Temperate Zone and offers favorable conditions for solar photovoltaic (PV) power generation. The average daily energy production per kW of installed solar capacity varies across seasons, with 7.61 kWh/day in Summer, 3.62 kWh/day in Autumn, 2.05 kWh/day in Winter, and 5.77 ...

Three companies have announced hundreds of millions of euros in investments in Montenegro. They intend to build three solar power plants and a wind farm in Rozaje, Savnik and Cetinje. The country recently reduced the ...

Montenegro's state-owned power utility EPCG and the Investment and Development Fund (IRF) have finalized a EUR10 million agreement to finance the Solari 5000+ 70MW project. The initiative, which has already commenced, aims to install solar systems for households and businesses across Montenegro. To date, the project has achieved an installed ...

The government recently reduced the value-added tax on the sales, installation, and imports of solar panels from 21% to 7%. Recent law amendments also simplified the procedure for solar power plants up to 1 MW. ... It is an additional impetus for the development of solar projects in Montenegro, which is set to boost solar power production by ...

It will offer the installation of another 5,000 rooftop solar power plants to households, legal entities and residential communities. Elektroprivreda Crne Gore (EPCG), controlled by the Government of Montenegro, recently revealed plans to install 15,000 more rooftop solar power plants, and the first phase is the launch of the Solari 5,000+ project.

Montenegro has also taken steps to reduce the cost of installation of solar panels, with a reduction in the value-added tax on sale, installation and imports of solar panels. The projects are expected to generate 219.9 GWh of electricity annually, which is equivalent to the power needs of around 20,000 households.
