Pacific Energy has acquired the Shell assets in 2010 to supply the Port Moresby International Airport. The Pacific Energy Group plays a key role in the international supply of Papua New Guinea. 2 new tanks will be commissioned in 2017 in order to optimize and extend our storage capacities and better serve our clients.

New nuclear is currently not expected to commission until 2025 and we currently have limited interconnectivity with continental Europe. The message is clear: renewable energy is here to stay and, in this context, the real estate sector is embracing the opportunity to adapt land use and adopt new technologies.

The energy sector of Papua New Guinea exhibits several dominant features that influence the formulation of an energy strategy: (i) PNG is richly endowed with energy resources, such as substantial reserves of oil and gas, ample hydro potential, geothermal potential, and a large supply of biomass. This is in stark

The shallow submarine hydrothermal systems of Tutum Bay, Papua New Guinea, are an ideal opportunity to study the influence of arsenic on a marine ecosystem. Previous reports have demonstrated that the hydrothermal vents in Tutum Bay release arsenic in reduced hydrothermal fluids into the marine environment at the rate of 1.5 kg of arsenic/day. ...
