In a solar warehouse; which is a new example of sustainable warehousing, roof of the warehouse is covered with solar panels so, both energy costs and carbon emission are reduced. ... The publication describes a project of installing a solar photovoltaic (PV) system to generate electric power at the H& W Warehouse in New Brunswick, New Jersey ...

In many ways, a typical warehouse roof offers the ideal landscape for hosting a solar power system. Not only does it have plenty of square footage to support a lot of solar panels, but it's also high enough off the ground that shade usually isn't a problem. Further, most warehouse roofs are pitched perfectly for catching the sun's rays at various points throughout the day.

Peru's efforts to diversify the energy mix with renewables. Peru boasts one of the strongest economies in Latin America. With prudent macroeconomic policies, Peru has been able to sustain a continuous recovery and increase per capita income by 50 percent over the course of a decade.
