

# Photovoltaic bracket aluminum alloy fixture manufacturing

Does aluminum alloy need aging heat treatment for solar photovoltaic brackets?

The commonly used aluminum alloy series for solar photovoltaic brackets need to undergo aging heat treatment to achieve the required strength. China Aluminum strictly controls the solution treatment and aging heat treatment process to ensure the required strength of the aluminum alloy brackets.

What types of solar panels does Chalco stock?

Chalco stock various aluminum extruded solar panel frames and photovoltaic support aluminum alloys, with a variety of finishes to choose from. If the existing products are not suitable for your needs, we can also customize them according to customer requirements.

Does Chalco provide anodized aluminum profiles?

Chalco provides anodized aluminum profiles to further enhance the corrosion resistance of solar aluminum alloy frames. After the production of aluminum profiles, we will provide strict product quality inspection and precise product film pasting, packaging and transportation.

Is aluminum a good material for solar panels?

With its advantages of light weight, high strength, corrosion resistance and durability, aluminum is widely used in building solar panel frames and photovoltaic supports. Research shows that aluminum is the most widely used material in solar photovoltaic (PV) applications, accounting for more than 85% of most solar PV modules.

Which materials are used in solar PV?

Research shows that aluminum is the most widely used material in solar photovoltaic (PV) applications, accounting for more than 85% of most solar PV modules. Products conform to CEE AAMA, GB, BS, EN; CE, DNV, ISO9001 certifications and can provide the TUV and other certifications. Welcome contact

Why do solar panels need anodized aluminum profiles?

Because the panel frame is exposed to the natural environment, it has high requirements for corrosion resistance. Chalco provides anodized aluminum profiles to further enhance the corrosion resistance of solar aluminum alloy frames.

It is one of the largest professional manufacturers of photovoltaic brackets in China and the Asia-Pacific region. As a global leader in photovoltaic mounting structure product manufacturing and system solutions, VersoSolar is committed to becoming a global leader of high-end equipment and intelligent services in new energy industry.

In order to ensure the welding quality of a high-speed train body sidewall, a series of fixtures are needed to locate and clamp the welding parts in the sidewall welding process. The fixture layout has a significant effect on the welding deformation. In this research, a modeling and optimization method of welding fixtures for a high-speed train aluminum alloy ...
