The installation selection of photovoltaic ground brackets is mainly based on factors such as the fixing method of the bracket, terrain requirements, material selection, and the weather resistance, strength, and stiffness of the bracket. First, there are many fixing methods, such as pile ...

reduced-scale photovoltaic bracket system. Then, the proposed method is applied to an actual photovoltaic bracket system. The calculations are performed for the magnetic field distributions and induced voltages under positive and negative lightning strokes. Keywords: lightning; transient response; photovoltaic (PV); magnetic field; induced ...

The basic working principle of the PV Mounting Bracket Roll Forming Machine is to feed the raw materials into the production line through the uncoiler, which is then fed and punched by the servo feeder and the punch unit/individual punch unit, respectively.

A calculating method is proposed for lightning transient analysis in photovoltaic bracket systems. The circuit parameters are evaluated for the conducting branches and grounding electrodes.

The company currently has high-precision equipment such as fully automatic photovoltaic bracket forming machine production line, cable tray forming machine production line, automatic cutting machine, hydraulic forming machine, CNC punching machine, CNC shearing machine, CNC bending machine, precision CNC plasma cutting machine, laser cutting machine, etc.
