The disadvantages of polymer solar cells are also serious: they offer about 1/3 of the efficiency of hard materials, and experience substantial photochemical degradation. Polymer solar cells inefficiency and stability problems, combined with their promise of low costs and increased efficiency made them a popular field in solar cell research.

Alternative Solar Solutions. An On-Grid rooftop solar energy system STOPS generating Electricity during a Grid power failure for "Anti-islanding" protection measures, which is a mandatory Safety feature. The On-Grid solar system requires a reference voltage from the utility-grid connection for its functioning, and hence a power-cut will result in the shut down of this Grid-Tied solar plant.
