

# Portugal solar energy ventures industries enterprise

How many solar energy startups are there in Portugal?

There are 49 Solar Energy startups in Portugal which include Galp, Rvesol, Martifer Solar, Martifer, Beon Energy. 1. Galp In 2022, the company recorded annual revenues of \$27.38B and a net profit of \$1.91B Tracxn Score: 61 /100 What is this? 2. Rvesol

Which companies have partnered with Portugal Ventures?

The startup has already partnered with Santander, Tranquilidade and Magnifinance. In the Engineering & Industry sector, Portugal Ventures has invested in Cleanwatts, a cleantech startup which designs digital platforms that simplify, broaden and accelerate energy decarbonisation.

How does solar energy work in Portugal?

Solar energy can be captured using solar panels, which are made up of photovoltaic (PV) cells that convert sunlight into electricity. The Portuguese solar energy market is segmented by end-user. By end-user, the market is segmented into residential, commercial, and industrial (C&I).

Why did Portugal Ventures add 43 new startups to its portfolio?

Porto, 8 April 2021 - Portugal Ventures is proud to announce that it is adding 43 new startups to its portfolio. These investments boost Portugal Ventures' positioning as a leading authority in funding entrepreneurship, aligning the capital needs of Portuguese businesses with the government's priority strategies to stimulate the national economy.

Is Portugal a good place to invest in solar energy?

Portugal has around 2,200 to 3,000 hours of sunlight each year, positioning it as one of the most attractive countries to invest in solar energy in Europe. As an example, the Portuguese Electric Company, EDP, has developed Alqueva, the biggest floating solar park in Europe, with an approximate size of four football pitches.

Does Portugal have a wind energy sector?

At the end of 2022, Portugal's wind power installed capacity was 5,671 MW. In 2021, wind power represented 26.8% of total electricity generation. Thus, Portugal's wind energy sector is likely to hinder the market.

The H2 from this project can be used by the local industry as well as processed to create green ammonia for export from the terminal at the port of Sines. Electricity will be sourced from renewable power produced in Portugal; in particular from renewable energy communities for wind and solar plants that are being developed in parallel.

The energy industry dominates mega-rounds. Given higher interest rates and fewer opportunities for later-stage startups to exit, capital flowing into tech ventures slows down. However, energy startups have shown resilience and even growth in megadeals. Compared to 2023, when the percentage of mega-rounds was 10%, by early 2024, this figure ...

This acquisition, one of Spain's largest renewable energy transactions, strengthens Masdar's presence in Europe's renewable energy market and reinforces its commitment to accelerating the energy transition in Spain, Portugal, and the broader region. It also supports Masdar's ambitious goal of reaching 100 GW of global capacity by 2030.
