While solar panels and wind turbines are a great source of power, their reliability is limited due to weather conditions. With our miniature smart-grid solutions you can complement your green power generation. If other methods aren't producing enough power, UP's generators will provide the necessary amps.

For more than a century, we have refined our original technologies and complemented them with breakthrough inventions developed by other 3M businesses. Today, our abrasives rely on traditional strengths, such as adhesives and coating, as well as the most modern technologies, from micro-replication to ceramics and non-woven materials.
