

Ranking of domestic production capacity of energy storage cells

Which energy storage cell manufacturers grew the most in 2024?

In 2024, global utility-scale energy storage cell shipments reached 283 GWh, up 68% YoY and 22.6% QoQ in Q4. The top five manufacturers were CATL, EVE Energy, Hithium, BYD, and CALB. CR5 has surpassed 75%, signaling a highly concentrated market with limited growth opportunities for new entrants.

What are the top 5 energy storage cell shipments in 2024?

The top five companies in global energy storage cell shipments for 2024 were: CATL, EVE Energy, BYD, Hithium Energy Storage, and CALB. The top themes for the year were: stability, market shift, and key clients. Stability: With years of industry experience, CATL maintains a clear market advantage and firmly holds the top position in the industry.

Are energy storage battery cells growing?

According to SMM statistics, global shipments of energy storage battery cells saw significant year-on-year growth, reaching 334 GWh for the year. Among these, lithium iron phosphate (LFP) energy storage battery cells accounted for 317 GWh.

How did energy storage cell shipments perform in 2024?

According to InfoLink's Global Energy Storage Supply Chain Database, global energy storage cell shipments totaled 314.7 GWh in 2024, up 60% YoY. The market showed a trend of early decline followed by a rebound, with 4Q24 shipments increasing 19.7% QoQ, reaching the annual peak for 2024.

Which Chinese energy storage battery companies performed well?

Chinese energy storage battery companies performed exceptionally well, achieving record-breaking global shipments. CATL maintained its leading position for consecutive years, while other companies such as EVE Energy, HITHIUM, BYD, and AESC followed closely. TOP 1 CATL

Who are the top energy storage cell makers?

Notably, CATL, BYD, and the newcomer Hithium are top energy storage cell makers, increasingly expanding into system integration. Top cell makers, with their technology and supply chain advantages, are strengthening their competitiveness in the full industry chain through vertical integration.

This ranking has changed significantly compared to 2023. Except for CATL, which continues to hold the top spot, the rankings of other companies are different. Specifically, four ...

Which country has the most battery-based energy storage projects in 2022? The United States was the leading country for battery-based energy storage projects in 2022, with approximately ...

Ranking of domestic production capacity of energy storage cells

erns of domestic energy storage system shipments. In 2023, BYDs total capacity of vehicle and energy storage batteries it in ed 40 billion yuan in two power battery projects. One is to build a ...
