

Renua energy Saint Lucia

What does Renua Energy do?

Renua Energy is a leader in NY's solar project development field. We offer a suite of professional services that are key to the efficient and profitable deployment of community-scale solar projects. Renua Energy also aims to build additional skills and relationships to remain resilient.

What is the energy potential of Saint Lucia?

Saint Lucia is a volcanic windward island, with large technical potential for geothermal, wind, and solar renewable energy generation, as well as use of solid waste generated by residents. Little technical potential for biomass or hydroelectric generation exists on the island.

Is Saint Lucia reliant on fossil fuels for electricity generation?

Like many island nations, Saint Lucia is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data

How much geothermal potential does Saint Lucia have?

The volcano that sits in the middle of Saint Lucia provides vast geothermal potential. Conservative estimates indicate more than 30 MW of technical geothermal potential; others estimate 170 MW. Estimates also show that development of this geothermal resource would likely be economically feasible.

Renua Energy was founded by David Byrne to provide professional photovoltaic project development services ranging from feasibility and start-up through to full design & engineering capabilities. In 2021, Renua added a full line of electric vehicle charging station capabilities ranging from host site evaluation through to installation and station commissioning.

Energy Report Card 2017: St. Lucia "AT-A-GLANCE" SUMMARY OF ST. LUCIA'S ENERGY SECTOR
ST. LUCIA'S ENERGY SECTOR PERFORMANCE AGAINST TARGETS Indicator Base /Current
Performance (Year) National Targets National Target (Proposed by CARICOM - CSERMS Report) 13
Indicative RE Oil Displacement 14, 15 Potential Annually**

Total Energy Consumption: Nuclear, Renewables and Other: Renewables and Other data remains active status in CEIC and is reported by U.S. Energy Information Administration. The data is categorized under Global Database's Saint Lucia - Table LC.EIA.IES: Energy Production and Consumption: Annual.

Renua Energy helps qualified businesses and property owners increase revenue and value by installing electric vehicle (EV) charging stations while taking advantage of substantial incentives at both the state and federal levels. Time-Sensitive Subsidized Opportunity in New York State.
