Is solar energy a good investment in Russia?

Even though demand for solar energy in Russia is low, the Moscow-based company, Hevel, is producing solar modules with an energy conversion efficiency of 22 percent, which is the world's highest. In addition to Hevel, only two other companies in the world produce solar equipment with similar efficiency: Panasonic (Japan), and Sun Power (U.S.).

How much solar energy does Russia produce?

Russia's share of solar energy production is a paltry 0.03 percent of the country's total, and to meet its electricity needs the country relies heavily on traditional energy sources with high conversion efficiency, such as gas, oil, hydro and nuclear. Nevertheless, in the past three years Russia has been rapidly developing solar energy.

Is solar energy on the verge of a major expansion in Russia?

Vadim Braidov /TASS Solar energy in Russia might be on the verge of a major expansion, thanks to a government support program for renewable energy sources, industry experts told The Moscow Times. Russia, the world's fourth-largest emitter of greenhouse gases, has historically relied on its vast oil and gas reserves to bolster its economy.

What is Russia's largest solar energy company?

With a capacity of 20 MW, it will power about 4,000 homes and will be launched in September. The Hevel Group ("hevel" means "sun" in the Chuvash language) is Russia's largest solar energy company, and was founded in 2009 by Renova and Rosnano, which have a 51-percent and 49-percent stake, respectively.

Does Russia have a solar power plant?

Nevertheless, in the past three years Russia has been rapidly developing solar energy. Kosh-Agachskaya solar power plant in the Republic of Altai was opened in 2014. In 2014, Russia opened its first solar power plant, and the country has 12 today. Soon the 13th will be launched.

Will Russia's energy policy change?

The Omsk, Altai and Zabaikalsky regions, the republic of Sakha and other locations in Siberia and Russia's Far East launched their first solar plants in recent years, according to Tatiana Lanshina, the director of think tank Target Number Seven Association. However, she added that so far there are no signs of major changes in state energy policy.

Rentech, the sister brand of SABAT Batteries, is a leading solar battery supplier that specialises in providing some of the best solar batteries for off-the-grid energy sustainability. Rentech's solar batteries offer exceptional energy storage capacity and cycle life, ensuring reliable and efficient power storage for residential, commercial, and industrial applications.

Rentech Solar Products. Rentech Solar PV Panels. The PV cells capture the energy of the sun and convert it into electricity. Rentech Hybrid Inverter. Incorporating all of the features needed to be used for grid-supported, stand-alone or backup applications. Rentech Lithium-ion Battery.

Many solar inverters nowadays have built-in solar charge controllers, as well as monitoring and control functions to enable grid-synchronisation. Quite often they also have an AC battery charger built-in to provide for charging of the batteries from the grid or a generator when solar energy is insufficient - this is referred to as a hybrid ...

Rentech is fully compliant with all the relevant codes and conditions that govern the correct and proper installation of a complete system. Established within the AutoX battery group, Rentech has a robust track record as one of the leading suppliers of solar and back-up power solutions.
