

Where is fenecon battery Refactory located?

Fenecon has opened its CarBatteryReFactory. The factory in Iggenbach, Lower Bavaria (Germany), produces large-scale stationary storage systems from new, disused electric vehicle batteries. Production of management systems for home storage systems has also been relocated to the new plant.

Where do fenecon batteries come from?

“We use the batteries that are already available in Europe,” says Fenecon CEO Feilmeier (3rd from left). Fenecon's new factory will produce industrial storage batteries from so-called zero and second-life vehicle batteries. Accordingly, Europe's largest production facility for storage units made from vehicle batteries will be created.

What is fenecon energy storage?

The FENECON electricity storage systems use the OpenEMS-based smart energy management system FEMS to enable grid-serving charging and discharging up to intelligent sector coupling of electricity, mobility and heat. At FENECON, we pursue the clear vision of the 100% energy transition.

How much does fenecon battery Refactory cost?

The newly named Carbattery Refactory will cost around 22 million euros in the first stage of expansion. Fenecon has already been producing large container storage units from electric vehicle batteries since 2017. Small series production is currently still taking place at the plant in Künzig.

Does fenecon recycle EV batteries?

Fenecon will soon be doing the same in North America: A second CarBatteryReFactory is being built in South Carolina, which will recycle EV batteries for the US market. haffapartner.com (in German) Fenecon has opened its CarBatteryReFactory.

Will fenecon increase its capacity with the carbatteryrefactory?

Fenecon will significantly increase its capacities with the CarBatteryReFactory: The company has been manufacturing large containerised storage units from EV batteries since 2017, but only in small-batch production at its plant in Künzig, Germany.
