The development of Agro-energy Company &#171;SALIX energy&#187; takes place under the prepared and approved strategy. According to its objectives set for the medium term up to 2015, it is expected to establish industrial plantations of energy willow (salix) in the areas of 1,800-2,000 ha and long-term contacts for the supply of biomass for domestic and European consumers of biofuels ...

Since its formation in 2004 up to 31 March 2023, Salix has helped public sector organisations commit to more than 22,000 projects by administering &#163;3.3 billion of funding, with projects saving 1.1 million tonnes of carbon dioxide annually.

The Salix Energy Efficiency Loan Scheme funds energy-saving and renewable energy projects at a fixed interest rate of 2.05% APR. Funding to cover 100% of the project costs. The technical scheme criteria have been extended to &#163;350 tCO<sub>2</sub>e with a 10-year payback; Support from a designated relationship manager through application and delivery.

Energy willow because of its stability and rapid growth is an ideal environmentally friendly solution for natural protection from wind and sunlight and creating a natural microclimate in places of human habitation. Elements of landscape design, decorative fences are made from the energy willow. Energy willow Vine is used in folk crafts.

The main objective of the H2020 funded EU project SEEMLA (acronym for "Sustainable exploitation of biomass for bioenergy from marginal lands") is the establishment of suitable innovative land-use strategies for a sustainable production of plant-based energy on marginal lands while improving general ecosystem services.
