A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. The chance of wet days in Saint Martin varies throughout the year. The wetter season lasts 7.0 months, from May 1 to December 3, with a greater than 12% chance of a given day being a wet day. The month with the most wet days in Saint Martin is September, with an ...

been efficiently applied to bagasse (Martin et al., 2008), Miscanthus (Sorensen et al., 2008), Aspen (Li et al., 2007) and Salix (Sassner et al., 2008) with the target being the production of carbohydrates for ethanol. The present study centers on the comparison between two types of pulp generated from *S. viminalis*. The biomass used for this

Martin was elected as the Chair of Salix Homes Limited Board in September 2024, having originally being appointed as the Chair of the Audit & Risk Committee in September 2023. He has over 23 years of experience within the social housing sector, with a particular passion for accessible, lifetime homes in inclusive communities.

The energy and mass flows were simulated for stages 2-4 in Fig. 1, comprising steam pre-treatment of Salix, co-digestion of Salix and hygienized manure to produce biogas, and upgrading of biogas to CBG, using the Aspen Plus process simulation software. Values for the heating, cooling, and electricity energy requirements of these stages were ...

Salix Energy has been successfully operating on the Ukrainian agro-energy market for over 10 years. The company's focus was mostly directed to biomass production. However as the world is moving towards a more sustainable, innovative future, Salix Energy has decided to expand its focus and introduce to the market new more environmentally ...

emissions from public sector buildings. Through Phase 4 of the Public Sector Decarbonisation Scheme, the Department for Energy Security and Net Zero will make capital funding available from 2025/26 to 2027/28.

The partnership was created to help the island rapidly reach its key energy goals by deploying an optimized mix of energy solutions for the lowest economic cost. Its inaugural public-private partnership with the Independent ...

Higher energy rivers can often be stabilised using bioengineering techniques. Salix have unparalleled experience in the design and implementation of these systems. Traditional engineering solutions have called upon hard revetments such as sheet piling, blockstone or gabion baskets, all of which can have a detrimental impact on river and riparian habitat. If hard ...
