

Salt energy Guinea-Bissau

Does Guinea-Bissau have offshore exploration potential?

The underlying offshore exploration potential of Guinea-Bissau has long been recognized given the country's functional hydrocarbon system, good potential reserves, and several drillable prospects in a vast shallow water shelf setting.

Can offshore Guinea-Bissau reshape the energy sector?

Offshore Guinea-Bissau is due to see some potentially transformative exploration drilling in the new future, and this drilling can have a great role in reshaping the energy sector in the West African country.

When will oil & gas drilling take place in Guinea Bissau?

According to PetroNor E&P, drilling for Blocks 2 and 4A&5A offshore Guinea Bissau under the Sinapa and Esperan Licences will take place between the end of this 2021 and next year. PetroNor E&P is a full-cycle Africa-focused independent oil and gas exploration and production business.

Is Guinea Bissau a good place to invest?

Although Guinea Bissau has not yet received the same level of attention from investors, its offshore areas hold good prospects for a variety of independent exploration and production (E&P) companies as well as International Oil Companies (IOCs) that are currently operating throughout the MSGBC Basin.

Does Guinea-Bissau have oil reserves?

Guinea-Bissau has authorized international businesses to begin prospecting for hydrocarbons in 11 offshore blocks where oil is likely to exist since October last year, according to the country's national oil company Petroguin.

Does Guinea Bissau have offshore acreage?

As in several other countries that make up the MSGBC Basin, Guinea Bissau has some highly prospective offshore acreage. In November of 2020, the independent oil and gas company PetroNor completed a purchase of acreage from SPE Guinea Bissau AB, a subsidiary of Swedish oil and gas company Svenska Petroleum.
