

Sustainable and resilient energy: Sint Maarten does not yet use much energy coming from renewable sources. Its energy sector strategy will be updated and will specify further the exact goals and steps to achieve the highest possible renewable energy sector sustainability by 2025. Sint Maarten is currently engaging

Energy Imports Net (% of energy use): It is estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ...
