We have two types of solar batteries in NZ, but we will help you choose the right one for your application.

Do you need a solar battery?

Solar panels are a fantastic start to a solar system, but if you don't use the power, it goes wasted. That's where a solar battery comes in. Solar batteries store unused or excess energy from your solar system to use when the sun isn't shining or during periods of high demand.

What is a solar battery storage system?

A solar battery storage system ensures a continuous power supply from your solar system, even on cloudy days and at night. Lithium-ion batteries are used as they have a high energy density, meaning they can store a significant amount of energy in a relatively compact size. Introducing the NEW Deye inverter to our Solar range.

Is a solar battery system worth it?

If you want to slash a few dollars off your energy bills and tap into your generated solar energy outside of daylight hours, then it may be worth adding a battery system to your home. It's important to keep in mind, however, that solar batteries are quite a significant financial investment.

What is a solar battery system?

The battery system lets you store excess power generated by your solar panels for later use at night or during cloudy days. Our team at Discover Solar is passionate about helping the local community find the ideal solar solution.
