VELUX INTEGRA solar awning blinds for flat-roof windows also offer privacy, reduced glare and control sunlight exactly as you like. The anti heat blind keeps room temperatures comfortable. It is designed for perfect integration with the flat roof window, which enables easy installation and an unobstructed view to the sky when not in use.

The dynamic character of outdoor blinds makes it possible to bring the best of the outside in during every season; unlike solar control glazing that blocks the sunrays all year round. So outdoor blinds prevent heat but allow in optimum daylight in the summer, and as much solar heat as possible in the winter, meaning you have control.

Solar shades function the same way as solar panels . You won't be able to power your entire home with solar shades alone. Solar shades typically cost about £925 per two square metres of window space. Solar shades are ...

At Solaire, all of our fabrics are flame-retardant and child-safe. On top of this, we provide additional solutions to enhance the performance of your blinds. For commercial buildings with a large surface area of glass, Solaire Blinds can provide Solar Protective Coating (SPC) to help keep your working environment stable.

Solar blinds

At Enviroblinds, we are passionate about our energy saving external blinds and solar shading products, which provide thermal and visual comfort for health and well being. External shading is the most energy efficient means of reducing overheating from excess solar gain and should be considered in all buildings to mitigate rising indoor temperatures, without the use of air ...

Our solar blinds are made from high quality fire rated fabric, which has a highly reflective silver exterior. They come in a range of colours and shades on the interior to cater for all tastes and uses. Request a free sample and we will send you swatch samples by post.
