Where is the solar power plant in Cagayan de Oro?

The CEPALCO has now getting the attention of my environment advocates as they introduce the Solar Power Plant in Cagayan de Oro, Philippines. The solar power plant has 6,500 solar panels and set on a 2 hectares of land in Barangay Indahag, Cagayan de Oro City.

Can Cagayan de Oro generate solar power year-round?

In conclusion, Cagayan de Oro offers suitable conditions for generating solar power year-round with proper panel installation and maintenance measures in place to address local environmental factors like rainfall and humidity that could potentially impede energy production efficiency.

When is the best time for solar power generation in Cagayan de Oro?

In Cagayan de Oro, the most efficient solar power generation occurs during summer and spring months because it lies within the tropics where seasons are typically defined by wet and dry periods rather than temperature fluctuations.

What is the topography of Cagayan de Oro?

The topography around Cagayan de Oro, Philippines is mostly mountainous. The area is located in the Agusan Valley and has an elevation of about 500 meters above sea level. Areas that are most suitable for large-scale solar PV would be flat or gently sloping areas with unobstructed access to sunlight, such as agricultural land or open fields.
