Our engineers install high performance JA Solar /REC and Sun Power solar modules together with SolarEdge optimisers and inverters.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

How reliable are solar panels?

Solar panels convert the light from the sun into electricity, with no moving parts they are very reliable a 30 year life is realistic, that means with payback averaged at 9 years, you can have 21 years of free electricity! Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity).

Do solar panels need to be south facing?

Solar panels need to be south facing for maximum exposure. Is your property surrounded by trees or buildings that may cast a shadow over solar panels - this can significantly reduce the amount of electricity generated. And, of course, is your roof structurally sound? Not only will it have to support the solar panels but also the fixing frames.

The project, which took 28 weeks to complete, has seen the installation of 224 solar panels across four elevations on Manx Telecom's headquarters building at the Isle of Man Business Park. Within the first few months of operation, the panels have already successfully harnessed an astounding 15.3 megawatts of renewable solar energy.

How much do solar panels cost on the Isle of Wight? Solar panels on the Isle of Wight cost £705 per 350-watt (W) solar panel, on average. A system with 10 of these panels - which adds up to the 3.5 kWp (kilowatt peak) we recommend for the average three-bedroom house - will therefore cost £7,050.
