The solar panels put out about 18V, and the doorbell circuit usually put out around 20V. Its been a few days and the doorbell is running on the battery overnight and charging back to 100% every day. This should work with any "12V" solar panel that's 5W or more. You can get a 5W solar panel for about \$15 on amazon.

How much do solar panels cost? A lot depends on the quality of materials used and the power output rating of the panels. Brands who use higher quality or more complex materials in their panels, or who offer higher capacity solar panels, are able to command a higher price per panel. But while they might seem pricey, they're likely to perform ...
