OverviewRenewable energiesElectricityThermal power stationsOilThe first solar panels were installed in 2009, and are not associated with storage. The installed capacity is 13 MW, in particular via the Longoni power plant, inaugurated in 2010. Solar energy is the only renewable energy with significant development potential on the island; the wind potential (22 MW according to a study) would not lead to a significant production because the wind blows only 6 months per year.

Pure Energy Solar offers turnkey solar solutions for residential and commercial sized solar power projects. If you're looking to reduce utility costs with solar panels and renewable energy, eliminate utility costs or have emergency back up solar power, Pure Energy Solar is dedicated to providing you with the ability to produce your own green power.
