How can solar power plants benefit Senegal?

The project estimates that more than 400 jobs in the towns benefit from the existence of the new solar power plants in Senegal. Because Senegal mainly relies on imported oil for electricity, solar power plants offer a more reliable and sustainable green energy source that costs less.

Who sponsors Senegal's solar power plants?

The PV plants, located in Western Senegal, are sponsored by Engie, Meridiam, and the Senegalese Sovereign Wealth Fund for Strategic Investments ( FONSIS ). The competitive tendering process was led by Senegal's Energy Regulatory Commission ( CRSE ). For more information, please read the press release here.

Will solar be Senegal's cheapest energy source?

The planned Scaling Solar projects underscore Senegal's commitment to integrating renewable energy resources into its energy mix. The successful tender set a new benchmark for the region. With prices under 4 US cents per kWh, solar energy will become Senegal's cheapest energy source. Questions or Interest? Subscribe to our mailing list.

Can Senegal develop 60 megawatts of solar power?

The government of Senegal has been working with the World Bank Group to develop 60 megawatts of solar power through Scaling Solar. According to World Bank data, over 70% of the population of Senegal currently has access to electricity.

Does Senegal have access to electricity?

The competitive tendering was led by Senegal's Energy Regulatory Commission (CRSE). Although the proportion of Senegalese people with access to electricity has increased sharply over the past 30 years, nearly a quarter of the population still lacks access.

AXIAN Energy secures \$89 million for two solar plants in Senegal's Kolda region to boost energy access. The Kolda solar farm aims to power 25,000 households and stabilize Senegal's grid by 2026. AXIAN Group's renewable projects across Africa support energy inclusion and local economic development.
