

Ten developers of solar energy parks and representatives of the industry have established association Solar Energy For Latvia with a goal to promote development of a unified strategy for the renewable energy sector and an uninterrupted energy supply ecosystem.. The members of the association have resolved to promote public awareness of the sector, raise ...

The nascent solar energy industry in Latvia is at a critical juncture. With the price of electricity having skyrocketed and the need for energy independence become abundantly clear over the past few months, solar installations will only increase in the coming years. And while solar power will never be the primary source of electricity in Latvia ...

European Energy started developing renewable energy projects in Latvia in 2021, and with the opening of its office in Riga, four employees have joined the company in Latvia to develop a strong pipeline of renewable energy projects in the country. Currently, the company has more than one GW development pipeline in Latvia, including both solar ...

Working together with the largest Latvian private energy group AJ Power, this summer SIA Lyngson installed the largest solar panel park in Latvia. Within the project, 1580 solar panels with the total capacity of 489 kW were installed on the roof of the production building. Currently, it is the largest installed solar panel park in Latvia, and it will generate almost ...

Latvia's energy transition is poised for renewed momentum. The IEA peer review of Latvia took place 18-25 September as part of Latvia's accession to the IEA. It came at an opportune time for Latvia, which is in the process of updating its National Energy and Climate Plan 2021-2030, in line with more ambitious European Union (EU) climate and ...
