Spero Energy seeks to increase the availability and competitiveness of biobased products. One area which could benefit greatly from a biobased and biodegradable product is the agricultural chelate market. Chelates are molecules which bind micronutrients essential for plant growth, and efficiently deliver the micronutrients to the plant. The main chelates used today are ...

Our transition from diesel generation to renewable energy is our progress towards achieving a sustainable power source for the Kingdom for generations to come. ... Tonga Power alongside the government of Tonga realizes this problem and has set a target that by 2030, 70% all electricity generation sources will be generated from renewable energy ...
