

What is electricity trading in Tajikistan?

Most electricity trading arrangements in Tajikistan today are long-term bilateral contracts with limited options for variations in volumes or price.

Can Tajikistan sell electricity to Iraq?

To sell electricity to Iraq, Tajikistan would have to wheel power through Uzbekistan and Turkmenistan via a 500 kV transmission line and through Iran. Challenges are associated with each step. Electricity transit through Uzbekistan and Turkmenistan would be necessary before delivering to Iran and eventually Iraq.

Should Tajikistan import electricity?

While exports are the prime motivation of Tajikistan to pursue cross-border electricity trade in order to gain revenue, the option to import electricity in times of shortage should be open. Imports could also delay or avoid the need to build new thermal generation capacity.

How much does electricity cost in Tajikistan?

A high prevailing cost of generation in a neighbouring country increases the favourability for exports, whereas a low prevailing cost of generation provides opportunity for imports. The estimated average marginal cost of generating electricity in Tajikistan is USD 6/MWh (RTE and ADB, 2020).

Does Tajikistan export electricity to Uzbekistan?

However, in 2018 Tajikistan reconnected and initiated bilateral electricity trade with Uzbekistan in which it exported 1.5 terawatt-hours (TWh) at USD 20 per megawatt-hour (MWh). The price and quantities are expected to be renegotiated every season. Electricity shortages in the winter are critical for Tajikistan.

Could Tajikistan be a flexible wind power provider?

In addition, in proposing connections to regions with significant shares of wind power like in Xinjiang province, Tajikistan could position a clear offering that takes advantage of its hydro resources as a flexibility provider.
