

What is a paternoster storage system (PNL)?

The paternoster storage system (PNL): A vertical carousel for maximum performance in a limited space. A circulating storage system in the form of a paternoster is particularly popular for small parts warehouses, as the advantages are obvious. On the one hand, space can be optimally utilized by building "upwards";

Can a paternoster be used with open-fronted storage containers?

The paternoster can be used with open-fronted storage containers to efficiently handle small parts via small parts containers, for example. They can be stored loose and without packaging. Important: A paternoster storage system as a circulating storage system cannot be extended at will. This is due to the rigid outer shell.

What is a paternoster storage system?

A paternoster storage system is a computer-controlled storage and transfer system that can significantly improve the efficiency of product storage and picking. These systems, which can be vertical or horizontal, are easy to integrate with a Company's existing Warehouse Management System (WMS). They can also be used as a standalone system.

What is a paternoster warehouse?

Note: A paternoster warehouse is based on the goods-to-man principle and facilitates the picking of small parts, which are made accessible quickly and compactly via so-called removal openings. It enables efficient, directly controllable storage, guarantees a high circulation speed and increases the storage area even where space is limited.

What is a paternoster & how does it work?

Shelving systems such as the paternoster can be tailored to the specific needs of the company, for example specifically for card index boxes or as a tiered paternoster for dispatch handling. It would also be conceivable to design the rail guide horizontally (so-called silo paternoster) in order to fully utilize storage space as far as possible.

What is a paternoster rack system?

A distinctive feature is the suspension distance between the supporting elements, enabling access to the stored material from atop. The paternoster rack system enables the utilisation of unused and unprofitable space.

Our paternoster shelves (carousel shelves) and storage system are unique automated paternoster shelves, based on mechanically simple, low-wear chain drives. This economic paternoster technology, completely Made in Germany, allows merging and utilising unused ceiling heights or, by means of breakthroughs, spaces above and below as storage space ...
