

The installed capacity of energy storage batteries has increased by 50

Our five-year outlook foresees significant BESS expansion in Europe - a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh, yet falls short of energy transition needs.

Strong growth occurred for utility-scale battery projects, behind-the-meter batteries, mini-grids and solar home systems for electricity access, adding a total of 42 GW of battery storage capacity ...

In 2023 alone, 17.2 GWh of new capacity was installed in Europe, an increase of 94 % compared to the previous year. Germany led this growth with 5.9 GWh installed, followed ...
