Launched in 2012, Solar Limpets are a unique innovation in roof hook technology. Designed by an installer for installers, providing economical, easy and fast installation onto most types of slate, 10 x 6 Rosemary type tiles and flat roofs.

The tilting brackets also allow the panels to ride over any roof vents that are likely to be in the way. In an ideal world the very best configuration is to have the panels mounted along the centre of the roof in a row that way they do not shade each other, they look right and are easy to get by for those who work off the roof a lot.
