Does Serinus Energy own Tunisia?

Schematic illustration showing plays and trap types across Serinus Energy plc's concessions in Tunisia. Tunisia remains relatively under-explored despite lying within the petroleum-rich Ghadames and Pelagian basins. Tunisia oil and gas company and opportunities from Serinus Energy.

How much electricity does Tunisia get from renewable sources?

Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW). In addition to wind and hydro, the Tunisian government plans to use biogas to produce renewable energy.

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production, processing and transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied electrical/renewable energies.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

Does Tunisia have a green wave of energy production?

This creates the overlap for biogas to take on some level of energy production in Tunisia's continued green wave of energy production. In 2016, Tunisia emitted 29 Mega tons of carbon dioxide equivalent (MtCO_{2e}) in greenhouse gases. The country aims to reduce its carbon intensity by 13% in 2030, compared to 2010 levels.

Is Tunisia a refinery?

The only refinery in the country, managed by the Tunisian Company of Refining Industries, is located in Bizerte. Its capacity is 34,000 barrels /day, which is a much lower production than the country's consumption, which therefore imports refined products, diesel chiefly. Refined petroleum is essentially imported too.

Sumterville -- SECO Energy held its 2024 virtual annual meeting celebrating its 85th year as an electric cooperative on Thursday, March 21. The meeting had a record number of member participation, with over 17,000 members participating in the cooperative's governance process through their vote on Annual Meeting business.

Free Trade Agreement between the EFTA States and the Republic of Tunisia, 17.12.2004 Bilateral agricultural agreement in French Message concernant l'accord de libre-échange entre les Etats de l'AELE et la République tunisienne du 11 janvier 2006

Significant progress has been made over the past decade in Tunisia, particularly in terms of democratic reforms. After the revolution of 2010/2011, Tunisia set out on a path to creating a modern democracy with marked decentralisation, the adoption of a new constitution as well as presidential and parliamentary elections.

The transition towards clean energy in Tunisia is being influenced and mediated by two main opposing discourses. The first is the dominant neoliberal hegemonic discourse, manifested through extractivism: a capitalist mode of accumulation exercised in the Global North to extract natural resources from other regions primarily through export. The ...
