

U S Outlying Islands accumulateur lithium

Will lithium meet global demand?

A new geological survey has discovered enough lithium to meet global demand for the next six years. The study, led by the United States Geological Survey, discovered between 5 million and 19 million tons of lithium reserves in a rock formation in the southern part of the continental US, Fox Business reported.

Could a supervolcano be the largest deposit of lithium?

In September 2023, scientists funded by a mining company reported finding what could be the largest deposit of lithium in an ancient US supervolcano. In April 2024, public researchers on the other side of the country reported another untapped reservoir - one that could cover nearly half the nation's lithium demands.

Can dissolved lithium replace US imports?

We estimate there is enough dissolved lithium present in that region to replace U.S. imports of lithium and more," said Katherine Knierim, a hydrologist and the study's principal researcher. The study's authors also made clear that the projections are merely estimates and the entire area has not been fully sampled.

What makes Lithium Americas a sustainable company?

Lithium Americas is committed to maximizing sustainable value for our diverse set of stakeholders and to safely build Thacker Pass in a responsible way. We are driven by our people and striving to become an employer of choice.

Could a lithium supply chain boost national security?

Create a free account to share your thoughts. Booming U.S. demand for lithium could spur a domestic supply chain to fuel clean energy economic growth and boost national security.

Will the Smackover replace US imports of lithium?

The potential for the Smackover to replace U.S. imports of lithium could help meet the stated objective of the Biden/Harris administration to free supply chains of minerals that are central to the success of electric vehicles and renewable energy from their current dominance by China.
