An uninterruptible power supply or UPS system protects data centers and equipment from temporary power outages and surges. UPS systems contain a battery backup that stores incoming AC power when your electric power supply fails. Your equipment can then run off DC power for a short time. Once the power returns, the batteries are recharged.

When assessing the uninterruptible power supply (UPS) market in the United Arab Emirates (UAE), it is important to consider the regulatory environment, economic conditions, and power infrastructure. The UAE
