

# Uruguay solar energy business

Does Uruguay have solar power?

While only about two percent of Uruguay's total energy production comes from solar sources currently, the potential for solar power in Uruguay is encouraging given the country receives an average of 1,700 KW per square meter of sunlight each year.

What is the energy industry like in Uruguay?

Throughout Uruguay, there is a strong emphasis on local energy production, particularly solar energy in rural areas, focusing on rural schools and churches far from the grid, as well as hospitals, hotels, sports clubs, and new public buildings.

Is Uruguay a good place to invest in energy?

With its gently-rolling landscape, higher than average year-round sunshine, and hundreds of miles of ocean and river coastline, Uruguay has prime space for deploying energy alternatives. In addition, the country has identified significant opportunities for generating energy from biomass produced by the agriculture industry.

Why is Uruguay a good place to start a business?

In addition Uruguay has great opportunities for generating energy from biomass produced by the agro industry. Using forward-thinking legislation and incentives schemes, Uruguay is also efficient at attracting good business within the sector.

Will Uruguay become a leading country in the development of E-Fuels?

Due to its highly decarbonized energy sector with strong wind and solar capacity, Uruguay is expected to become a leading country in the region in the development of e-fuels, or synthetic fuels that are produced using renewable energy.

Does Uruguay have a good energy policy?

Uruguay is at the vanguard of energy policy in Latin America and the world and its successful model has been emulated by a number of other countries. The keys to achieving these milestones have been the country's natural conditions, political will and public-private investment.

Solar parks developer Sky Solar has received loan of \$55.7 m from Inter-American Development Bank (IDB), for the development of six photovoltaic solar energy plants in Uruguay. The company will also receive additional loan worth \$19.3m and \$10m from The China Co-Financing Fund and the Canadian Climate Fund respectively for these projects.
