The ambitious RPS targets previously included the establishment of a target of 5.1 percent of electricity sales from qualifying solar electric generation facilities by 2021 (known as the solar carve-out). New Jersey initially established the Solar Renewable Energy Credit (SREC) market to achieve both the RPS and solar carve-out targets.

For Wendy's, this solar partnership is a major ... with Wendy's demonstrates that Ampion is able to support these organizations in reducing emissions and putting more renewable energy on the grid ...

What is the Dual-Use Solar Energy Program? o The Dual-Use Solar Energy Act requires BPU to develop rules and regulations for dual-use solar in New Jersey. o BPU's process for developing new programs typically involves developing a Staff Straw Proposal for public stakeholder input. o BPU has contracted with the Rutgers Agrivoltaics Program

New Jersey Energy Flow Model. June 2015. The New Jersey Energy Flow Model describes the use and flow of energy within the state. This document describes the results and methods used to construct the model that quantifies where all of New Jersey's energy comes from, how it is used within different end-use segments, and all the connecting flows.

The rapidly evolving renewable energy market is increasingly driven by strategic partnerships and mergers and acquisitions (M& A). These collaborations between renewable energy developers, utilities, financial institutions, and other stakeholders play a crucial role in accelerating the scale-up required to meet global
